Linkedin | Github | Portfolio

Summary

Computer Science undergraduate skilled in React.js, Node.js, JavaScript, Express.js, MongoDB, SQL, and REST APIs. Strong foundation in Data Structures Algorithms, OOP, DBMS, Operating Systems, and Computer Networks with experience building scalable web applications.

Education

Graphic Era Hill University, Bhimtal

Sep 2022 – Jun 2026

Bachelor of Technology (Computer Science Engineering)

Technical Skills

Languages: Java, JavaScript (ES6+), C++, SQL

Frontend: React.js, Redux, React Hooks, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, CRUD Operations, API Integration, WebSockets

Databases: MongoDB, MySQL, Database Design, Query Optimization

Tools: Git, GitHub, Postman, VS Code, Figma

Cloud DevOps: AWS, Google Cloud Platform (GCP), Docker, GitHub Actions, CI/CD, Linux

Core CS: Data Structures Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design, SDLC, Agile Methodology

Experience

JavaScript Code Editor — E-Com Experts

2025

- Developed 10+ reusable React components using modular architecture, improving development speed by 25
- Converted 15+ Figma designs into responsive web interfaces with optimized rendering performance and cross-browser compatibility.
- Collaborated on frontend feature implementation, debugging, and API integration in a production environment.

Academic Research Contributor — Database Systems

2025

- Analyzed 15+ research papers and evaluated multiple indexing techniques to identify database query optimization strategies.
- Documented ML-based indexing approaches and presented findings to improve technical understanding among peers.

Projects

Real-Time Chat Application

Feb 2026

Tech Stack: React.js, Node.js, Socket.io, MongoDB

- Developed a real-time messaging platform supporting 50+ concurrent users using WebSocket communication.
- Implemented REST APIs, asynchronous event handling, and scalable backend architecture.
- Reduced message delivery latency by 40

AI Code Explainer

Aug 2025

Tech Stack: React.js, OpenAI API

- Built an AI-powered application to analyze and explain source code using OpenAI API integration.
- Implemented real-time API communication, error handling, and responsive UI design.
- Improved debugging efficiency by 35

Python-to-JavaScript Transpiler

Jan 2025

- Designed a transpiler using lexical analysis, tokenization, parsing, and Abstract Syntax Trees (AST).
- Processed 20+ language constructs while demonstrating compiler design and software engineering concepts.

Certifications

- AWS Cloud Foundations
- Google Cloud Computing Foundations
- MongoDB Toolkit
- AI with Python

Leadership

- Led coordination of a university technical fest with 100+ participants, managing execution, stakeholder communication, and cross-functional collaboration.
- Mentored 5+ student volunteers and facilitated smooth event operations.
